SURESEARCH DIGITAL MEDIA TRAINING

Our last two training sessions with Phil Choi will focus on using images in WordPress, Facebook and Twitter.

We will learn how to

- upload images from phone and other camera devices
- find copyright free images on the internet
- use Canva free software to make images the right size and shape for blogs, facebook and twitter
- use these images in your blogs, and social media posts

There are two three hour sessions:

Wednesday 26 June
10.30 – 13.30

Learning about digital images
finding images
image sizes for social media
using Canva to resize images

Wednesday 10 July
12.00 – 15.00

Taking photos with your phone
uploading your images
editing in Canva
posting with finished images

It's best if you have attended some of our previous training sessions, but if you have become familiar with Facebook or Twitter in other ways, that's fine. For the sessions, you will need your email and social media log-in details. We will be using desktop computers in the Park House computer room, and your own camera device if you have one. Having your own camera or phone is not essential.

If you are interested in attending these sessions, please complete the attached application form, and return to Stephen Jeffreys at suresearch.org@gmail.com as soon as possible for best chance of a place, and by the end of Friday 21 June.
